

Cam-Grid® GP

The Most Adaptable Belt for Spiral Cage Systems

Cam-Grid® GP

- Narrow link profile allows for drop-in replacement and retrofits on existing units
- Available in both mesh overlay and rods-only construction
- Operates as a traditional low-tension system with tension on the outside edge

Advantages

- Special welding process allows for superior strength over traditional spiral cage belts
- Fully collapsible for easy cleaning
- Reduces energy costs due to greater load capacity in smaller systems
- Allows product loading from link to link
- Extended pitch provides excellent strength-to-weight ratio
- Most cost-effective solution for standard low-tension applications

BeltTechSpecs

- Belt Pitch: 1.378" (35mm)
- Turn Ratio: 1.6-2.2 x belt width
- Tension rated for 200lbs. (90.7kg)
- Widths up to 48" (1219mm)
- Speeds up to 80fpm (24mpm)
- Materials: T304SS
- 6 gauge (4.87mm) rod
- Mesh overlay available in 16, 17, or 18 gauge

Cam-Grid® GP: Designed specifically to adapt to general purpose use
